Review digest

Clean facts are already filed; only what matters waits — cleared on your schedule, never as an interruption.

- people
- commitments
- payments
- documents

Resolve meaning once — then reuse it

A private, per-user foundation — graph + vectors — with provenance & audit on every fact.

Communications lens

The full surface — the cold-start engine

Reasoning lens

Answers over your own life, not a blank window

WHERE YOUR DATA LIVES

Cloudhosted

Home-server

Local foundation · data stays home

Two tiers, one product

Cloud, or a home-server where data physically can't leave the house. Both \$100/mo — private by design.

PSL

Version 1

Own your context — communications resolved into a foundation, put to work, with you in control.

REASONING · OVER HELD MEANING

"What did I promise Glenn?"

Send the deck by Friday

traced to your email · Tue 9:43

Source traces & audit

Every fact shows where it came from

Deterministic-first, human-gated

Clean writes commit instantly; only the consequential or ambiguous stop for your approval.

Connect your apps

Email, calendar, contacts, messaging stay as-is — meaning flows in.

🔍

Tell me what you need...

⌘K

The Navigator

Plain-language intent in, approved action out.

Document lens

Files, contracts, receipts → payments

Photo / media lens

Date/place/object + OCR · no faces (V1)
